

Your partnership in industrial vision

Image processing library

For your industrial vision applications

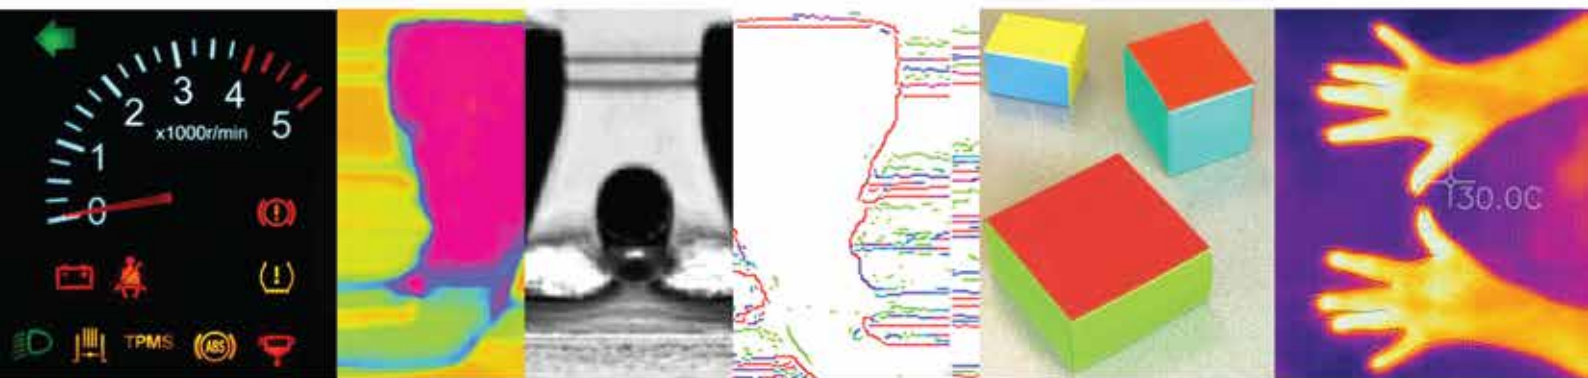

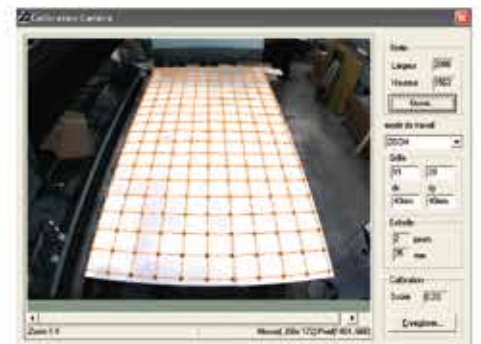

Quality inspection, measure, inspection, sorting

Process inspection, identification

Software tools of image processing

Color and monochrome, 2D & 3D

Compatible with numerous development environment

More than 100 image processing functions

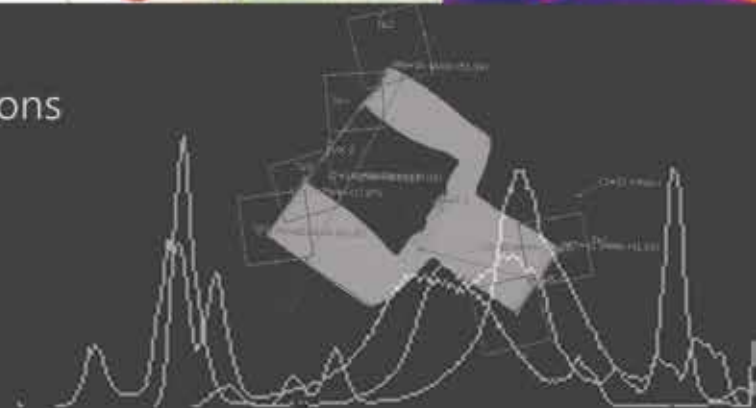

Acquisition, display, images recording

Threshold, segmentation, statistical analysis

Filters, image recovery, outlines extraction

Morphology, color space change

Labelling, pattern recognition

25 years of experience to serving industry

Devoted functions

Pleasant setting by graphical interface

Devoted tools at the inspection & calibration of display unit

Gips4 :: Pixy, inspection of dashboards, numerical display

Gips4 :: Graduel, inspection of analogical display, dials, needles
